Want To Know

How To Save On

Your Electric Bill

Every Month?

Martin Feldman
WA State Distributor
206.325.2230

Answer "YES" to more than one question and you might be saving more than you thought possible on your next electric bill!

- Do you use air conditioners/central air/rooftop fans?
- Do you have a refrigerator/freezer/compressor?
- Do you use a washing machine or a dishwasher?
- Do you have a number of appliances or mechanized loads?

The Many Benefits Of Our ES Energy Savers

- Lower electric bills up to 25%!
- Reduce electricity required by inductive loads (motors)!
- Eliminate harmful power surges!
- Protect appliances and sensitive electronic equipment!
- Power Factor Optimization!

**THE ES ENERGY SAVERS CAN
SAVE YOU UP TO 25% ON YOUR
ELECTRIC BILL EVERY MONTH!**

Give'm a break

Currently people often do this at work:

Arrive and put food into a fridge.

When break time starts-move
food from the fridge into a
microwave and heat food for up
to 6 minutes. Eat their meal.

Hot Logic Day-

Arrive at work...put food into
the Hot Logic...when the break
starts, their meal is ready!

Hot Logic

right temp. right meal. right time

An Approach to Go Green

	REDUCE CONSUMPTION	REDUCE COST	IDENTIFY & CAPTURE INCENTIVES	MONITOR & MEASURE	MANAGE AMBIGUITY
GREEN IT OBJECTIVES	<ul style="list-style-type: none"> • Reduce IT footprint • Energy efficient IT and infrastructure • Optimized water consumption • Reduced waste generation, e-waste, and increased recycling 	<ul style="list-style-type: none"> • Optimized rates and pricing structures • Aggressive third party contract management • Provisioning into lower cost markets • Capture and re-use of natural resources • Monetized recyclable waste 	<ul style="list-style-type: none"> • Federal incentives • State & Local incentives • Utility based incentives 	<ul style="list-style-type: none"> • Defined IT and Data Center KPI's for power and energy • Monitoring and measurement for continuous improvement 	<ul style="list-style-type: none"> • Monitoring of trends and game changers including: <ul style="list-style-type: none"> - Energy prices - Energy supply and consumption - Regulators trends - Customer and social preferences
BASE	BUSINESS PERFORMANCE IMPROVEMENT & CHANGE MANAGEMENT (Tailored for Green IT)				

SAFE FOR PEOPLE. SAFE FOR PETS. SAFE FOR THE PLANET.

- Zero VOCs, Zero Toxins. That's right – ZERO.
- No warning label – our paints are so safe the government doesn't require Mythic Paint to carry a warning label like other premium paints.
- No "new paint" smell.
- No toxins – Others labeled as low VOC or "green" have removed some of the toxins from existing formulas. Mythic Paint never had them and never will.
- Even though some "exempt" products may be labeled zero VOC or low VOC because they don't cause smog, they contain certain VOCs that are detrimental to health and the environment.
- So safe we're being used in environments where air quality matters:
 - Hospitals
 - Museums
 - Veterinary clinics

Thin Film over Metal

Here is a great example of self-adhering, flexible thin solar panels being applied to a Garland R-Mer® Span metal roof system. As with all self-stick technologies, proper preparation of the substrate is key to its long-term performance. These lightweight panels are the perfect solution for structures that cannot support the added weight load of traditional crystalline panels, or where vandalism is a concern.

Garland Energy Systems, Inc. is a wholly owned subsidiary of Garland Industries, Inc. Established in 1895, as a supplier of refining products, The Garland Company, Inc. has evolved from a local manufacturer and distributor of oils, greases and paints to a worldwide leader in manufacturing high-performance roofing and building maintenance systems. As Garland continues to innovate with new products and customer-driven technologies, Garland Energy Systems was a natural progression. Our mission is to bring the best value in renewable energy systems to our customers.

✓ Oil and petrochemicals testing must validate compliance and ensure that the products meet contractual specifications. Inspectorate's network of ISO 9001 certified laboratories independently analyze products to the exacting standards of each individual client to certify, identify, or oversee the quality of the product.

Inspectorate can offer over 800 analytical capabilities and services, including but not limited to:

- *Regulatory Fuels Certification - EPA, CARB, state oversight programs*
- *Motor Gasoline – ASTM D4814, Standard Specification for Automotive Spark-Ignition Engine Fuel*
- *Ethanol (E85) – ASTM D5798, Specification for Fuel Ethanol (E75-E85) for Automotive Spark-Ignition Engines*

Gasoline Analysis Include:

- *Oxygenates – ASTM D4815, ASTM D5599*
- *Aromatics – ASTM D1319, ASTM D5769, D5580*
- *Benzene – ASTM D3606*
- *Olefins – ASTM D1319, ASTM D6550*
- *Sulfur Content – ASTM D2622, ASTM D5453, ASTM D7039*
- *Vapour Pressure – ASTM D5191*
- *Distillation, Driveability – ASTM D86, ASTM D4814*
- *Corrosive Properties – ASTM D130, ASTM D4814 Annex 1, NACE TM0172*
- *Gum Content – ASTM D381*
- *Oxidation Stability – ASTM D525*
- *Lead Content – ASTM D3237*
- *Phosphorus Content – ASTM D3231*
- *Manganese Content – ASTM D3831*
- *Octanes – ASTM D2699, ASTM D2700*

Ethanol (E85) Analysis Include:

- *Ethanol Purity – ASTM D5501*
- *Hydrocarbon/Aliphatic Ether Blend Content – ASTM D4815*
- *Vapour Pressure – ASTM D5191*
- *Sulfur Content – ASTM D2622, ASTM D5453, ASTM D7039*
- *Acidity – ASTM D1613*
- *pHe – ASTM D6423*
- *Gum Content – ASTM D381*
- *Inorganic Chloride – ASTM D7319, ASTM D7328*
- *Water Content – ASTM E1064*
- *Copper Content Content – ASTM D1688*
- *Appearance – ASTM D4176*

Other fuels capabilities include ultra-low sulfur diesel (ULSD), biodiesel (B100), petroleum diesel and biodiesel blends (Bx), and denatured ethanol

- ❖ **Sustainability** – Contains agricultural and forestry by-products in the ingredients as its absorbent.
- ❖ **“Cradle to Cradle” Design** – Utilizes natural by-products to produce it's absorb.
- ❖ **Innovation** – Tested as a bio-preferred absorbent by USDA, bio-based products are made from renewable plant sources and are generally safer for the environment than petroleum based counterparts (i.e. clay, synthetics pads)
- ❖ **Viability** – Made from recycled bio-based products, 4 ½ times more absorbent than clay. Can be recycled again and used as a fuel source.
